

YALE COMMENCEMENT WEEK

(Continued from Third Page.)

abiding, or at least determined that others shall be so, once become satisfied that the law is being used to get the guilty free, and irregular methods of weakening vengeance are inevitable. A rigorous enforcement of the law is therefore as necessary to the protection of the innocent as to the punishment of the guilty.

He spoke favorably of government control of natural monopolies, saying that civil service reform overcomes the objection that these monopolies could be used for political purposes. He stated that corporate greed was a source of peril. He is especially vigorous in his denunciation of trusts.

Another evil and menace is the growing tyranny of labor. A possible remedy was profit sharing.

Independent thought and a free press he thought were the bulwarks and safeguards of our nation.

It has been given to the nineteenth century to teach the world how a great republic can be founded upon principles of justice and equality; it will be the duty of the twentieth to show how it can be preserved against the insidious encroachments of wealth, as well as the assaults of the mob. It will be your privilege to demonstrate that great states are as compatible with free institutions as small ones, and your duty to testify to your faith that this shall be the best as well as the greatest government, by taking an active interest in its administration and bearing your share of its burdens. The progress of all civilization has been from the reign of will to the reign of law, and as a rule the government is freest whose courts of justice are purest. Freedom and justice are ill-mated companions, and at the basis of every free government is the ability of the citizen to apply to the courts for a redress of his grievances and the assurance that he will there receive what justice demands. So long as we can preserve the purity of our courts we need never despair of the republic.

INFANTS DYING.

Early Appearance of Cholera Infantum.

Serious Times Ahead for the Badly Nourished Ones.

When Children Run Most Risk of Diarrhoea.

The Diet Invariably Used in Most Careful Homes.

Children Take Lactated Food Eagerly and Retain It.

Only by the most judicious feeding can children be saved from intestinal disorders that now lie in wait for every feeble infant.

Children should not stop growing and steadily increasing in weight during the summer months. Any decline in strength, activity and high spirits at such times should be even more quickly observed and remedied than at other seasons. Any sign of let-up in the healthy nourishment of the child should be met with lactated food.

The carefully studied composition of this perfect infant diet, so accurately adapted to the needs of growing children, makes easy to induce them to take abundant food of a highly nourishing quality and of absolutely assured purity. Babies fed on a diet of lactated food lose that pinched look almost immediately; the profuse perspiring that usually accompanies weakness ceases; their sleep becomes restful, and their pale cheeks and white lips get full and ruddy.

All this change will be due to the simple effect of that richer, complete and more satisfying diet of lactated food.

At the beginning of the summer the physicians give warning that the utmost care must be taken to use pure food for children. That this emphatic warning does not reach every city and town in this state is evident from the high infantile death rate. But in those places where the newspapers have published the discussions that are now going on regarding proper infant feeding in summer, large quantities of lactated food are used. The result is, statistics show, that the fewer deaths occur in those towns and cities where the larger amount of lactated food is used.

Comparisons of this sort are absolutely convincing. June is a fatal month for the little ones, and without the utmost care the local physicians say that the dreadful mortality and increasing amount of sickness among children will continue.

The one safe plan is to feed infants on lactated food.

Physicians say that in every case of cholera infantum the child is improperly fed and nourished, and hence the disease.

"It is absolutely certain," says a physician, in one of the medical journals, speaking of the alarming summer mortality, "that the large cause of this high death rate among infants is indigestion."

Thousands of physicians prescribe lactated food for their little patients at the beginning of the summer, with the full assurance that the dread disease is not likely to appear in that family.

Too food is so inexpensive that it is within the reach of every one. One hundred and fifty meals can be made from a dollar package of the food, and prepared for use it costs less than five cents a quart.

Mothers must remember that cholera infantum can be more easily prevented than cured. Feed the baby with pure lactated food, and keep the child well and strong.

In the honor are John Stalge Davis, San Antonio, Tex., and George Webber Mixer of this city.

DR. T. MITCHELL PRUDEN TO SPEAK.

Dr. T. Mitchell Prudden of New York, the distinguished expert, will deliver the annual address in medicine at Battell chapel to-day at 12 o'clock noon. His subject will be "New Outlooks in the Science and Art of Medicine." This evening a reception will be given in his honor at the residence of Professor William H. Carmalt at 87 Elm street.

Shortly before 4 o'clock yesterday afternoon a still alarm of fire was sent in to No. 1's engine house for a fire on the Washington street bridge. The firemen promptly responded and upon their arrival discovered a very promising blaze in progress. Several of the planks of the bridge were quickly ripped up and the incipient conflagration extinguished. The damage is slight. The blaze was caused by sparks from a locomotive.

About 10:30 o'clock yesterday morning a gasoline stove exploded on the sidewalk in front of the store 601 Grand avenue. Captain Hurley of engine company No. 4, who happened to be in the vicinity, promptly extinguished the flames. The damage amounts to about \$10.

NARCOTI-CURE CURES THE TOBACCO HABIT IN 4 TO 10 DAYS

OR MONEY REFUNDED.

Use All the Tobacco You Want Till Your "Craving" is Gone.

NARCOTI-CURE is the only remedy in the world that acts directly on the nerves and drives the nicotine from the system in from four to ten days. It leaves the patient in better health than before taking, and is warranted free from any injurious ingredients.

NARCOTI-CURE is popular because it allows the patient to use all the tobacco he wants while under treatment, or until the "craving" and "hankering" are gone. It is then no sacrifice to throw away tobacco forever.

NARCOTI-CURE is sold at the uniform price of \$5.00 a bottle and one bottle cures.

Money refunded if a cure is not effected when taken according to directions.

PROF. W. N. WAITE, Of Amherst, Mass., Chewed Tobacco for 40 Years, and Was Cured by NARCOTI-CURE.

AMHERST, MASS., February 8, 1895. THE NARCOTI-CURE CO., Springfield, Mass.

Gentlemen—Replying to yours of the 1st, would say that I have smoked for 40 years, and of late have consumed a 10-cent plug a day, besides smoking considerably. I commenced to use tobacco when I was only 11 years old, and have never been able to give up the habit until I took NARCOTI-CURE, although I have tried other so-called remedies without effect. After using your remedy four days, all "hankering" for chewing disappeared, and in four days more smoking became unpleasant. I have no further desire for the weed, and experienced no bad effects whatever. I am gaining in flesh, and feel better than I have for a long time. To all who wish to be free from the tobacco habit I would say, use NARCOTI-CURE. Yours truly, W. N. WAITE.

BRIDGEPORT STORE ROBBERED.

Quick Arrests by the Police and Recovery of the Stolen Property—Bound Over Yesterday.

Bridgeport, June 24.—Another daring burglary was committed in this city early Sunday morning, and again the police distinguished themselves in capturing the burglars a few hours afterwards. Not only did they do that, but they succeeded in recovering almost all the stolen property at the same time.

The place entered was the jewelry store of Breckbill & Benedict, at 511 Main street. The burglars forced the rear window and got away with about \$100 worth of silverware, eye glasses and cheap watches. It is believed that the men were scared off before they had finished the job by hearing Officer Golden rap on the sidewalk with his club, as he was passing about the time the burglary is supposed to have been committed. Three men were arrested for the crime, and in the city court this morning, two of them were bound over under bonds of \$1,000 each, while the other was able to clear himself and get clear through the medium of a note.

The men bound over are John Higgins and John O'Neill. The first named belongs in New Haven, but has been living here for some time with a disreputable woman. O'Neill is a notorious burglar. He has already served time for burglary. It was he who crawled into T. J. Murphy's saloon on Main street one Sunday morning about a year and a half ago, and got away with quite a sum of money. He was captured by the police soon afterwards and sent to state prison. The man allowed to go is Walter Foley. He was able to prove that he left for New Haven on the midnight train before the burglary was committed.

Brotherhood of St. Andrew.

Waterbury, June 24.—Yesterday at Waterbury, at the sixth annual convention of the Connecticut Diocesan union, Brotherhood of St. Andrew, officers were elected as follows: President, W. C. Johnson of Windsor; New Haven, W. C. Sturges of New Haven; Middlesex, A. C. Gildersleeve of Portland; Naugatuck Valley, I. G. Chatfield of Waterbury; Fairfield, F. M. Merriweather of Norwalk.

A large number of delegates were present. The principal addresses were made by Rev. R. H. Gomer of West Haven, and Rev. O. H. Raftery of Portland.

A Bicycle Race July 4th.

Michael F. Sullivan of the Quinipiac brewery and Frank J. Higgins of the Lion brewery will race on bicycles July 4. The course is to be from Sacred Heart Catholic club in Howard avenue to Branford and return. Heavy odds are being placed on Sullivan. It is predicted that he will break the record. It is expected that the distance will be covered in twenty-four hours. Both men are believed to possess great endurance and are known to be stayers—when they get possession of a chair.

T. Francis Maher and William Coe will follow the contestants in an ambulance. The men will take their first lesson on the wheel at City Point this evening.
